

DESIGN BUILD SOLUTIONS.

**A seamless team.
A single solution.**

Our design build approach allows clients to accurately predict project costs throughout the design process.

Founded in 1981, Thielsch Engineering offers consulting, design, and energy services throughout the United States and internationally. Its special emphasis on environmental testing, energy supply and efficiency, and design/build services helps meet the important challenges of our time.

CEC Engineering
MEP/FP Consulting Engineers

Creative Environment Corporation (CEC) provides a wide range of clients with the highest quality MEP/FP Engineering and Design Services. We are a service oriented professional engineering group that is not satisfied with mediocrity; we strive for excellence on all our projects. We have become leaders in our industry because of our dedication to client satisfaction, accuracy, punctuality, and close attention to detail on all our projects.

Coldmasters
Commercial/Industrial/HVACR

Coldmasters offers a single source responsibility in HVAC and Refrigeration applications. Our services include repairs and retrofits preventative maintenance, engineering services and complete installation of new equipment. We generate unique solutions to complex problems to achieve the optimal balance of energy efficiency, reliability, healthy and safety, and lifestyle costs. We are committed to exceptional quality.

ON TIME, ON BUDGET
